	Peer to Peer Encrypted	**Silo** Encrypted	**Federated** Encrypted
Availability	Lower	Higher	Lower
Usability	Lower	Higher	Lower
Compatibility	Lower	Lower	Higher
Authenticity	Higher	Lower	Higher
Control	Higher	Lower	Higher
Anonymity	Higher	Lower	Lower

Relatively better is not necessarily good. For example, federated and peer-to-peer models have better authenticity than silo models, but still in practice have many authenticity problems.
